

# SHOOT FOR THE STARS

# Lasso the Planets

## Materials:

- Round balls of all sizes
- Hula Hoop/s
- Strong string/rope
- Scissors
- Tape (optional)

## Instructions:

- Tie 6+ feet of string or rope onto each hula hoop so it can be thrown like a lasso (If needed secure the rope knot around the hula hoop with tape)
- Outside, spread out different sized balls over a large surface area. The different balls will represent the planets (soccer ball = Earth, tennis ball = Mars, basketball = the sun, etc.)
- Use the hula hoop lassos to try to lasso the planets (balls) and bring them towards you
- Alternatively, place the planets (beach balls) into a pool and stand on the outside edge to lasso the floating planets
